

## WE HAVE A NEW LOGO!

Cocolalla Lake Association asked Mrs. Vann's 5-6 grade [Southside school] class to hold a logo contest to create a conceptual logo that would reflect the watershed as a whole. The class of 26 each created at least one logo. The project incorporated science and art. Mrs. Linda Muskopf and Bonnie Anderson of the lake association gave the class a talk on watersheds.

Pictured left to right: Mrs. Vann, Josh Wren and Linda Muskopf

Cocolalla Lake Association was pleased to provide \$30 to Mrs. Vann's class that will be used for a Science publication.

The class was also involved in the living stream program, which is sponsored, by fish and game. It is a program where the students involve the whole school in the life cycle of 200 kokanee that are then released into the wild. They are raised in the school!

The class also attended the Water Festival in May, sponsored by Tri-State Water, BSWCD [Bonner soil and water conservation district] and fish and game, the program is aimed to educate all 5 graders in the workings of Watersheds.

The Southside School's PTA along with Baker Construction built a Gazebo that holds 2-3 classrooms and enables outside classes. The Gazebo is located at the top of a Nature trail with 24 stations that educate the children on native plants and wildlife.

Cocolalla Lake Association is honored to present Josh Wren, son of Wayne and Shainnie Wade, \$50 from private donations, as the winner of this logo contest. Josh's logo reflected the complete cycle of Watershed and was very well done.

When Josh was asked what he would do with the winnings he replied, "I'm going to give \$20 to the class, another \$20 to a smaller class and the remaining \$10 to my neighbor who had heart surgery and can't afford the medicine." It was a humbling experience.

The logo contest was a part of the Watershed education program implemented by CLA. It is the CLA mission to "Halt and Reverse the eutrophication process occurring in Cocolalla Lake"
